

FUEL SAVINGS:

7.15% IN SAE J1321 TEST

LENGTH:	19-22' (DEPENDING ON CONFIGURATION)
HEIGHT:	32"
WEIGHT:	180-223 LBS. (DEPENDING ON CONFIGURATION)
PANEL:	STEEL PANEL WITH LDPE CORE AEROGUARD STANDARD: SILICA IMPREGNATED POLYESTER COATING
LOWER SKIRT:	THERMOPLASTIC VULCANITE (TPV). SLIDES INTO CLIPS ON THE PANEL
STRUT:	HD STRUT. STEEL WITH DUAL COIL SPRINGS

The TrailerBlade™ Reefer side skirt was specifically designed to be compatible with your reefer trailer, regardless of size. It has the highest ground clearance of any side skirt and provides easy tank access wherever the tank is located on your trailer.

TrailerBlade™ side skirts have proven **fuel savings of 7.15%** at highway speeds in strict accordance with EPA testing guidelines. Not only did TrailerBlade™ pass the SmartWay® certification requirement for an Advanced Side Skirt, but it also conclusively exceeded the certification requirement.

The Upper Panels are polyester-coated steel with a polyethylene core, the optimum balance of aerodynamic efficiency and flexibility.

The Lower Skirt is made from a thermoplastic vulcanizate compound, or TPV. Our patented design maintains aerodynamic integrity while maximizing ground clearance. It will maintain its aerodynamic profile in triple digit temperatures and yet be flexible enough to pass over objects in temperatures as low as minus 40 degrees.

TrailerBlade™ Struts

Our patented Mounting Strut is made of high-strength steel that pivots and articulates. This four-way adjustment prevents damage and ensures a perfect installation on every trailer. The slim profile resists snow, ice, and mud buildup. And the triple-coated galvanizing protects from the effects of corrosion.

Installation

With its modular design, TrailerBlade™ installs faster than any side skirt on the market. No special tools are required. TrailerBlade™ Reefer products are all designed to be installed in one man hour.

10-YEAR LIMITED WARRANTY

FleetAero® side skirts are now available with FleetAero® warranty. For more information, please visit Fleetaero.com/warranty

TANK ACCESS

Fits popular Thermo King, and Carrier™, specifications. Tank can be completely covered or uncovered. All tank locations are CARB approved.

TRAILERBLADE™ DOORS

For your convenience, we give you the option of installing TrailerBlade™ doors designed to fit any TrailerBlade™ skirt. The push button mechanism gives you easy access to spare tire, battery compartments, storage boxes, or tire chains. They're easy to install and are available in 36" and 48" widths for up to 6 doors per trailer.
